No. 180.

TUESDAY, JULY 3, 1900.

Mr. Hanna's orators are preparing to go before the country and throw dust into the eyes of the people by saying: "We tried to put through an amendment against trusts, but the Democrats would not let us." They misjudge the character and insult the intelligence of the great body of the American people if they think the people can be deceived by any such "stage tricks" and "grandstand play" as has been gone through in this important matter.

While the Republican majority in Congress was framing constitutional amendments and putting anti-trust planks in the platforms, the trusts were not scared even a little bit at such performances. They know that all the noise is only stage thunder; that it is "only thunder in the index," and that the after chapters will be entirely lovely and serene. But one party in America today has the courage to deal with trusts in the interests of the people.

The United States Senate is not controlled by the States, but when the party whip is cracked with orders from the Executive Mansion, the Senators obey the whip and fall into line. This is caused largely by the fact that in too many instances the Federal power secured their election to the Senate, and they are dependent upon the Federal power for the retention of their seats in that body. If they were dependent upon their States for their tenure of office, they would act for the States and guard the interest of the States. The Democratic party favors electing Senators direct by the people.

It must be a terror to Mr. Beldier, the Congressional candidate of the 20th district, to read in cold type of the great revolt in the Republican ranks of his district, especially that in Medina county, says the Wadsworth Banner. A Republican, well versed in the politics of Medina county, informed us this week that from all sources he could glean Mr. Beldier would not lose 200 votes in the county. There is no revolt in the county and no independent candidate can cut the least bit of a figure. Beldier will receive the full vote of Lake county, and Cuyahoga will do her share toward electing him, and he will be elected by a safe majority.

"I want to denounce this doctrine that God has selected the Republican party to wage in His name a war of conquest. I say I believe in God. I will not deny that there may be prophecies today. But the trouble is to tell the true prophets from the false ones. The Bible says that false prophets

will arise, and it tells us how to distinguish the false from the true. It says: 'By their fruits ye shall know them.' And if you want to know whether a man is speaking with the voice of God when he tells you of our benevolent purposes in the Philippine Islands, see if he has acted with the spirit of God in his treatment of the American people. There may be prophets, but you will pardon me if I express it as my deliberate opinion that when God gets ready to speak to the American people he will choose somebody besides Mark Hanna as his mouthpiece."—Wm. J. Bryan.

... The ... Popular SINGER!

The Singer Piano, an honest piano at an honest price, has grown in popularity until today it stands without a rival in its class. The Singer Piano company conceived the idea of making a splendid piano, which could be sold at a price within the reach of all, and at the same time have all the essential elements which go to make up a thoroughly reliable instrument. How well they have succeeded can be best judged by the results.

The Singer Piano today has its home in the ware rooms of the most responsible and experienced dealers in the country. The demand for these pianos has forced the company to enlarge their factories from time to time until they now have one of the largest and best equipped factories in the world, with a capacity of ten thousand pianos per annum. The wonderful success of this piano is without parallel in the history of the trade. We carry a large stock of these beautiful instruments and would be pleased to have you examine them before you purchase.

WATER WORKS

For Cuyahoga Falls.

System Will be In Before Snow Flies.

From Whence Will the Water Come?

Village May Pay Its Money and Take Its Choice.

Litigation Is Over, But Some Are Still Kicking.

(Special Correspondence.)

Cuyahoga Falls, July 3.—At last a long felt want is to be filled, inasmuch as the village will have a water works system.

About a year ago a special election was held to decide whether or not the village was to have a water works system. It carried. Then work was stopped by citizens filing a suit in the Common Pleas court to prevent the levy, claiming that the tax rate would be excessive. This court decided the levy to be legal. It was carried to the Circuit court and the decision was affirmed, as was it also by the Supreme court last Friday. All that now remains to be done is for the Council to pass an ordinance to issue \$50,000 worth of bonds and take the usual preliminary steps, and then proceed with the work, which will be under control of the Water Works Trustees—Thos. A. Steel, Geo. James and Jacob Senn.

Yesterday afternoon a special meeting of the Council was called, and the Water Works Trustees asked to meet with them. No quorum could be secured, however, thus no action was taken in the matter.

Mr. Thos. A. Steel, president of the Water Works Trustees, stated last night that they expected to put up the buildings and machinery and lay the main pipes before winter, so that everything will be in operation for fire protection at that time. Next summer the territory will be mapped out complete and pipes laid accordingly.

Just from what source the village will secure the water is not decided. Several propositions are under consideration. One is to use the water from the big springs, near the Big Springs laundry, another is to pipe water from Crystal lake at Randolph park, while there is much talk of developing the springs below the Glens. Others think it the best policy to drill wells. The springs on the Reed farm are also spoken of as a good supply.

Mr. Steel says that it will require

Can any woman afford to ignore the medicine and the advice that has cured a million women?

1½ miles of pipe to complete the system.

Although the water works system is assured there are people still kicking. Some argue that a sewer system should be put in first. Others claim that the natural drainage is good enough at present.
